**Question 28.** A. that B. which                                      C. what                                      D. where

**V. Reading: Read the passage and choose the correct answers:**

Scientists often divide resources into two groups: renewable and non-renewable. When a resource is used, it takes some times to replace it. If the resource can be replaced quickly and easily, it is called renewable. If it cannot be replaced quickly and easily, it is non-renewable. All fossil fuels are non-renewable resources. Solar energy, air, and water are usually called renewable because there is an unlimited supply.

However, this definition may change if people are not careful with these resources. The amount of solar energy that reaches the earth depends on the atmosphere. If the atmosphere is polluted, the solar energy that reaches the earth may be dangerous. If humans continue to pollute the air, it will not contain the correct amounts of these gases.

Many resources are limited and non-renewable, and many are in danger of pollution. As a consequence, resources must be conserved and the environment protected. Conservation must become an important part of everyone's life.

**Question 29.** What will happen if the atmosphere is polluted?

- A. Life won't continue as it does.                                      B. The air won't contain the correct amounts of natural gases.  
C. All are correct.                                      D. Renewable resources will soon become non-renewable.

**Question 30.** Why do we have to conserve resources?

- A. Because conservation is our duty and it hasn't become an intergral part of our life.  
B. Because many resources are unlimited and non-renewable.  
C. Because many resources are running out and at risk.  
D. Because conservation is our duty and it has become an intergral part of our life.

**Question 31.** Non-renewable resources are those which \_\_\_\_\_

- A. take millions of the years to replace.                                      B. can be replaced quickly and easily.  
C. are unlimited.                                      D. are used every day such as solar energy and water.

**Question 32.** How many kinds of resources are mentioned in the passage?

- A. 2                                      B. 4                                      C. 3                                      D. 5
